

Scottish Fold																	
Body	<p>The medium to large sized cat is muscular and stocky. Chest, shoulders and back are broad and massive.</p> <p>The legs are short and muscular, the paws are thick and round.</p> <p>The tail is of medium length, reaching at least to the shoulders. It ends in a rounded tip. It should not have thickened areas or stiffness and should be fully flexible up to the tip.</p> <p>The neck is short and solid.</p>																
Head	<p>The head is rounded, massive, broad with a firm chin. The nose is short, broad and straight. The profile is curved (without a stop). The cheeks are full and round.</p> <p>The large, round whisker pads give definition to the short, pronounced muzzle.</p>																
Ears	<p>The ears are small and forward folded, with slightly rounded tips, which point towards the centre of the head. They are set wide apart and lie flat to the skull.</p>																
Eyes	<p>The eyes are large and round. They are wide set.</p> <p>Eye colour corresponds with the coat colour.</p>																
Coat	<p>The coat is short and very dense, standing off from the body. It is plush, due to substantial undercoat. The texture is crisp, not woolly.</p>																
Colour varieties	<p>All colours, patterns with any amount of white and pointed colours with Siamese points without white are recognized. The description of colours is listed in the general list of colours.</p>																
Faults	<ul style="list-style-type: none"> • Inflexibility of any part of the tail is a severe fault. • Ears not lying flat to the skull • Profile with a stop
